

MOBILedit Forensic

MOBILedit Forensic PRODUCT LINE FOR LAW ENFORCEMENT

MOBILedit Forensic

All-in-one forensic tool for physical and logical analysis

MOBILedit Forensic is an all-in-one solution for data extraction from phones, smartwatches and clouds. It utilizes both physical and logical data acquisition, has excellent application analysis with the best application data parsing in the field, deleted data recovery, a wide range of supported devices, fine-tuned reports, concurrent processing, and easy-to-use interface. With a brand new edition PRO+, MOBILedit Forensic is much stronger in security bypassing than ever before.

PRO Edition	PRO+ Edition
Advanced App analysis	ALL FEATURES OF PRO PLUS
Smartwatch forensics	Security bypassing
Face and object recognition	Password bruteforcing
Malware detection	Advanced deleted data
UFED compatible	Password recovery
App downgrade	

License is perpetual and comes with 12 months of all updates and upgrades, including the Live Updates service. Number of connected phones isn't limited and there is no per-phone fee. Activation is online, with an activation key received by email after the purchase. Dongle activation for network isolated computers is also available.

Software Updates

Software updates are available in 12-month packages, allowing you to order 1, 2, 3, or more years' worth of updates at once. This includes all updates and upgrades, including Live Updates. Keeping software license updated is essential for ensuring the software delivers the best possible results.

Online Training with Certification

Online training combines self-study through the MOBILedit Academy platform and online consultations with our training team. Participants conclude the training with an exam, and upon passing, receive a Certificate of Completion.

Hardware Training

In-person, hands-on training led by experienced field specialists offers in-depth instruction on Hardware Methods ISP and Chip-off, alongside expert strategies for Advanced Security Bypassing Techniques with MOBILedit Forensic.

MOBILedit Cloud Forensic

MOBILedit Cloud Forensic is a complete cloud data forensic downloader and report generator for the most popular services. It can immediately start downloads when authentication information is found in a phone, and it can run multiple extractions concurrently when time is of the essence. It supports the most popular cloud-based services such as Dropbox, Box, Microsoft OneDrive, Google Drive, Facebook, Instagram, LinkedIn, Twitter, Facebook Messenger, Slack and more. Subscription based.

Available in 2 editions

- Integration with MOBILedit Forensic, or
- Standalone version

Camera Ballistics

Camera Ballistics is a unique software that uses advanced algorithms and cutting-edge technology to determine if a photo was truly taken by a suspected camera or not. Camera Ballistics compare the photos under investigation to the sensor fingerprint to determine if there is a match. Also works with UFED and other tools. One time license fee.

MOBILedit Connection Kit

A special collection of custom-made USB cables that covers the vast majority of phones ever manufactured including discontinued and even ancient models. Everything is designed to allow for convenient and trouble-free work. The cables are short and well-labeled. The briefcase is lightweight with build quality ready to handle the most rugged everyday usage.

MOBILedit Smartwatch Kit

With the rise of popularity of smart devices, smartwatch forensics starts to play an important role in the discipline of digital forensics. The Smartwatch Kit contains essential hardware - special readers, cables and accessories for smartwatch forensic analysis. Alongside with MOBILedit Forensic you will be able to extract valuable information from the most popular smartwatches like Apple Watch, Garmin, Samsung, Alcatel, TCL and others.

MOBILedit Dive Kit

The MOBILedit Dive Kit is an essential hardware not just for coastal countries but also for those with lakes and deep waters, essentially covering almost all nations worldwide. To utilize this hardware, the MOBILedit Forensic software is required. MOBILedit Forensic is capable of providing a complete and detailed dive log from over 200 models across all major manufacturers such as Suunto, Oceanic, Mares, Aqualung and others.
